

**The Prairie Sands Chapter of The Prairie Enthusiasts
invites you to a special program**

The Geology of Native Plant Communities

**Guest Speaker: Dr. Maureen Muldoon, Associate Professor
Of Geology, UW- Oshkosh**

**Tuesday, February 8, 2011, 7 p.m., Meeting Room at the
Wautoma Public Library, Wautoma, Wisconsin**

What's in your backyard soil? Clay, loam, sand, wet or dry? Whether you have stewardship of a small garden plot or several acres of land, there are certain native plants that will do very well for you. Come listen to Maureen weave the entire picture for you, starting with the geology of our local areas.

The program is free and open to the public. While you are there, learn more about The Prairie Enthusiasts, Master Gardeners, The Wild Ones, and other similar groups in our area.
